metallurgy and technology of steel castings is a comprehensive textbook for students and professional engineers in the field of foundry engineering and materials science the topics covered in this book explain the association between the quality of liquid metal and the properties of the finished cast readers will learn about the thermodynamic conditions for addition and recovery of chemical elements such as cr ni and mo in steel degassing processes the influence of alloying additives for manufacturing steel castings that operate in extreme temperatures anti corrosive steels and basic cast conditions for making the castings pouring and heat treatment systems metallurgy and technology of steel castings gives readers essential information about steel and steel cast manufacturing processes and equips them with the knowledge to overcome the challenges faced in the foundry environment

discusses in nontechnical language ten central questions about technology that illuminate what technology is and why it matters technology matters writes david nye because it is inseparable from being human we have

used tools for more than 100 000 years and their central purpose has not always been to provide necessities people excel at using old tools to solve new problems and at inventing new tools for more elegant solutions to old tasks perhaps this is because we are intimate with devices and machines from an early age as children we play with technological toys trucks cars stoves telephones model railroads playstations through these machines we imagine ourselves into a creative relationship with the world as adults we retain this technological playfulness with gadgets and appliances blackberries cell phones gps navigation systems in our cars we use technology to shape our world yet we think little about the choices we are making in technology matters nye tackles ten central questions about our relationship to technology integrating a half century of ideas about technology into ten cogent and concise chapters with wide ranging historical examples from many societies he asks can we define technology does technology shape us or do we shape it is technology inevitable or unpredictable why do experts often fail to get it right how do historians understand it are we using modern technology to create cultural uniformity or diversity to create abundance or an ecological crisis to destroy jobs or create new opportunities should the market choose our technologies do advanced technologies make us more secure or escalate dangers does ubiquitous technology expand our mental horizons or encapsulate us in artifice these large questions may have no final answers yet but we need to wrestle with them to live them so that we may as rilke puts it live along some distant day into the answers

technology and society traces the history of developments in science and technology from the stone age to modern times and analyses how cultural attitudes and values have influenced their development and use and how technology has affected our lives it discusses recent developments in information and space technology and examines the many facets of our prospects for survival in a safe and sustained world it is useful for students of science and the humanities and for general readers

includes a mid december issue called buyer guide edition

technology and society a world history explores the creative power of humanity from the age of stone tools to the digital revolution it introduces technology as a series of systems that allowed us to solve real world problems and create a global civilization the history of technology is also the history of the intellectual and cultural place of our tools and devices with a broad view of technology we can see that some of the most powerful technologies such as education and government produce no physical object but have allowed us to coordinate our inventive skills and pass knowledge through the ages yet although all human communities depend on technology there are unexpected consequences from the use of technology which as ede shows form a crucial part of this rich story
